ZF8HP45, ZF8HP50/Z, ZF8HP51, 2010-On
"D" Clutch Hi-Performance G3™ PowerPack®

Alto # 215756

View and download the instruction sheet

This PowerPack® kit features 1 additional friction, 1 additional steel, and 1 redesigned stepped pressure plate over the OEM stack-up design. The addition of an extra friction disc will increase the holding power of the clutch pack when it's engaged. The redesigned pressure plate is 55% thicker than the OEM pressure plate, this will prevent flexing and clutch pack burnup issues that exist in these applications.
